

To whom it may concern and good day! it will be much appreciated not only by only me, but thousands or millions of deaf and hard of hearing viewers if there is some improvement in garbled statements as well as typing every single word or any pausing or missing words. We would hate to miss anything which causes us some confusion in what they announce in news, shows, movies or any other programs. Once done, we can enjoy any type of programs with less confusion in the near future. We would, very much, like to have equal understanding of what is going on TV at any time like hearing people. Thank you for taking your time in listening or reading our feedbacks.
